

Jasper Technologies has specialist teams of engineers that designs, manufactures and supplies complete equipment packages for the Oil and Gas markets. JTI designs and manufactures well testing, production and managed pressure drilling services. With meticulous attention to detail, JTI offers packaged solutions that are both versatile and seamless: everything has been designed to work together perfectly whilst giving operators the flexibility to adapt. With a wealth of hands-on experience from across the world, JTI provides products that are perfectly suited to your application through tried and field tested solutions. Fully certified to industry and governmental standards and backed up by extensive operational experience and customer support, JTI packages let you get on with the job on hand, safe in the knowledge that you're backed by world class standards and products.
